## ADVANCED ULTRA DEGREASER

- Description:** An extremely effective detergent concentrate, formulated for use in automatic floor scrubbing machines.
- Fast:** Emulsifies and affects the release of greasy, oily soils with minimal dwell time on the surface to be cleaned.
- Safe:** Biodegradable – for environmental friendliness  
Low Sudsing – for vacuum recovery protection  
pH Balanced – removes the soil, not the substrate
- Economical:** This highly concentrated proprietary blend of water soluble solvents, sophisticated surfactants, and detergency builders works to make the hardest water the “solvent of soil.”
- Usage is 2 – 3 oz. of chemical per 1 gallon of water, depending on soil conditions. Thus, your machine can clean 1000 sq. ft. of floor for pennies.

Inform the person contacted of the type of extent of the exposure, describe the victim's symptoms and follow the advice given.  
**Skin:** Immediately remove contaminated clothing. Rush all affected areas with large amounts of water for at least 15 minutes. DO NOT attempt to neutralize with chemical agents. Obtain medical advice immediately if irritation persists. Wash contaminated clothing prior to reuse.  
**Eyes:** Immediately flush the eyes with large quantities of running water for a minimum of 15 minutes. Hold the eyelids apart during the flushing to ensure rinsing of the entire surface of the eyes and lids with water. DO NOT attempt to neutralize with chemical agents. Obtain medical attention as soon as possible. Oils or ointments should not be used. Continue the flushing for an additional 15 minutes if the physician is not immediately available.  
**Ingestion:** DO NOT induce vomiting. Immediately give large quantities of water or milk, if available. If vomiting does occur, give fluids again. Never give anything by mouth to an unconscious person. Call a physician of the nearest Poison Control Center immediately.  
**Inhalation:** Remove from contaminated atmosphere. If breathing has ceased, clear the victim's airway and start mouth-to-mouth artificial respiration, which may be supplemented by the use of a bag-mask respirator, or a manually-triggered, oxygen supply capable of delivering 1 liter/second or more. If the victim is breathing, oxygen may be administered from a demand-type or continuous-flow inhalator, preferably with a physician's advice. Contact a physician immediately.
