

Total Clean Equipment

Autonomous Floor Scrubber Readiness Checklist

- Evaluate square footage of the facility
- Identify daily cleaning time windows and frequency
- Assess the consistency of the floor layout (obstacles, open areas, furniture)
- Confirm floor surface type (tile, concrete, epoxy, etc.)
- Determine level of debris or soil buildup
- Verify availability of water refill and disposal stations
- Check for available Wi-Fi or cellular connectivity for reporting features
- Evaluate integration with current janitorial workflows
- Assess staff readiness for autonomous machine supervision
- Plan for preventative maintenance and service intervals
