

Total Clean Equipment

Ride-On Sweeper Evaluation Checklist

- Determine square footage of facility to match sweeper capacity
- Assess indoor vs. outdoor usage requirements
- Choose fuel/power source: battery, LP, diesel, or gas
- Evaluate hopper size and high-dump capabilities
- Check for dust control features (filters, vacuum system)
- Consider aisle widths and turning radius for maneuverability
- Review side broom and main broom configuration
- Ask for maintenance accessibility and ease of servicing
- Compare operator comfort features (ergonomics, cab visibility)
- Request demo and review performance on-site
